

Strategic Dialogue on Sustainable Raw Materials for Europe (STRADE)

Start:

1st of December 2015

Division:

[Resources & Transport](#)

Description:

The "Strategic Dialogue on Sustainable Raw Materials for Europe" (STRADE) addresses the long-term security and sustainability of the European raw-material supply from European and non-European countries. Using a dialogue-based approach, the project brings together governments, industry and civil society to deliver policy recommendations for an innovative European strategy on future EU mineral raw-material supplies. The project holds environmental and social sustainability as its foundation in its approach to augmenting the security of the European Union mineral raw-material supply and enhancing competitiveness of the EU mining industry. Over a three year period (2016-2018), the STRADE Consortium of 7 partners, funded by the Horizon 2020 Programme of the European Union, brings together practical experience, legislation, best practice technologies and know-how by addressing: - Strengthening the European raw-materials sector - A European cooperation strategy with resource-rich countries - Internationally sustainable raw-material production & supply
